EDUCATION

St. Joseph's College Of Engineering and Technology (SJCTET)

March 2023–July 2027 (Expected)

Bachelor of Technology in Computer Science and Engineering

CGPA: 7.88

St. Ephrem's HSS, Mannanam

March 2023

State Board of Kerala - 12th Grade

97.5%

EXPERIENCE

Frontend Developer Intern – Nexus SJCTET

June 2025

- Served as a **Frontend Developer Intern** for 1 month, gaining practical experience in React-based development, modern UI practices, and real-world project workflows.
- Developed a responsive upload interface using **HTML, CSS, and React**, implementing validation logic, improving UI responsiveness, and enhancing overall usability and interface performance.

ACHIEVEMENTS

NPTEL/SWAYAM – Python for Data Science

March 2025

- Successfully completed the **Python for Data Science** certification with a **75% score (Elite + Silver grade)**, demonstrating strong proficiency in Python programming and data analysis concepts.
- Gained hands-on knowledge of **data manipulation, visualization, and foundational data science workflows** using Python.

Python Programming Competition - 2nd Prize

October 2025

- Secured **2nd prize** in a Python programming competition conducted at the college, demonstrating strong proficiency in Python programming, logical reasoning, and problem-solving skills.
- Competed in timed coding challenges involving algorithmic thinking, efficient code implementation, and real-time problem analysis.

PROJECTS

CivicPulse – Smart Civic Issue Reporting Platform

March 2026

- Developed a full-stack civic complaint management system using **Node.js, Express.js, TypeScript, React, and PostgreSQL** that enables users to report KSEB and PWD issues with image uploads and geolocation tracking, routing complaints to relevant departments for efficient handling.
- Implemented **JWT and Google OAuth authentication, role-based access control, and multi-stage complaint lifecycle tracking**, allowing real-time status updates, structured workflows, and improved transparency compared to manual reporting systems.

Smart Inventory Dashboard

January 2026

- Engineered a responsive inventory dashboard using **React, JavaScript, and CSS** to display products, manage stock levels, and highlight low-stock items through dynamic visual alerts and mobile-optimized UI components.
- Developed a lightweight **Node.js and Express.js REST API** for product retrieval and stock updates, incorporating input validation, state handling, and local data storage to support efficient inventory operations.

Questlytics – LLM-Based Question Paper Analysis Tool

June 2025

- Built an **LLM-powered system** to analyze previous year question papers, identifying repeated questions, topic-wise weightage, and exam trends to support data-driven exam preparation.
- Developed a **Responsive Upload Interface using HTML, CSS, and React**, enabling efficient file handling and reducing manual effort in question analysis through improved usability.

TECHNICAL SKILLS

Programming: Python, C, C++, Java, SQL, HTML/CSS, JavaScript

Frameworks/Tools: React, Node.js, Express.js, Prisma, Git, GitHub, VS Code

Database: PostgreSQL (Supabase)

Concepts: Data Structures, Algorithms, REST APIs, Authentication (JWT, OAuth), Frontend Development
