SUMMARY

Full-Stack Software Engineer and B.Tech. Computer Science student specializing in software development, web application development, and AI/ML integration. Shipped 3 production-grade full-stack applications with 15+ REST API modules and 70+ automated tests using Next.js, React, TypeScript, Python, FastAPI, PostgreSQL, and LangGraph. Proficient in frontend development, backend development, REST API design, system design, JWT/OAuth authentication, CI/CD pipelines, Docker, Git, unit testing, and agile SDLC delivery.

EDUCATION

St. Joseph's College of Engineering and Technology (SJ CET) <i>Bachelor of Technology in Computer Science and Engineering</i>	Aug 2023 – May 2027 CGPA: 7.88/10
Higher Secondary School (HSS), Kottayam, Kerala <i>Kerala State Board - Class XII (Computer Science Stream)</i>	Mar 2023 97.5%

TECHNICAL SKILLS

Core:	Full-Stack Development, Software Engineering, Web Development, REST APIs, Backend/Frontend Development, System Design, CI/CD, Docker, Git, Agile/Scrum
Languages:	Python, JavaScript, TypeScript, SQL, Java, C++, C
Frameworks & Libraries:	Next.js, React, Node.js, Express.js, FastAPI, HTML5, CSS3
Databases & ORM:	PostgreSQL, MongoDB, Prisma, Supabase
AI & Backend:	LangGraph, OpenAI APIs, AI/ML Integration, Prompt Engineering, REST API Design, JWT, OAuth, RBAC
Cloud & DevOps:	Git, GitHub Actions, Docker, Vercel, Render, Clerk, Cloudinary, CI/CD, Test Automation
Concepts:	Data Structures & Algorithms, OOP, System Design, API Development, SDLC, Unit Testing (Jest, Pytest), Responsive Design

EXPERIENCE

Frontend Developer Intern - Nexus SJ CET <i>React, JavaScript, HTML, CSS</i>	Jun 2025
- Collaborated with a cross-functional team to ship frontend features across 3+ internal modules in React, JavaScript, HTML, and CSS, improving UI consistency across 5+ application screens and 3+ user workflows. - Engineered the Questlytics upload interface supporting 3 file formats (PDF, DOCX, JPEG) with multi-file selection, enabling document intake across 5+ workflow screens. - Built a reusable React component library adopted on 5+ screens, reducing duplicate UI code and accelerating delivery of 3+ feature modules using Git version control.	

PROJECTS

IntervAI - AI Interview Intelligence Platform <i>Live Demo: interv-ai-zeta.vercel.app</i>	Apr 2026 – Jun 2026
- Engineered and launched a production-grade AI interview platform with Next.js, FastAPI, PostgreSQL, LangGraph, and Supabase, delivering 15+ REST API modules and 14+ frontend routes across a TypeScript/Python stack. - Automated quality assurance with 70+ backend tests and zero-downtime CI/CD via GitHub Actions and Docker, validating all 15+ API modules for reliable production deployments. - Developed 5 AI-powered modules across 14+ routes - mock interviews, resume analysis, weak-area detection, analytics dashboards, and roadmaps - secured with JWT authentication, speech-to-text, and PDF parsing.	
CivicPulse - Smart Civic Issue Reporting Platform <i>Live Demo: civic-pulse-platform.vercel.app</i>	Nov 2025 – Mar 2026
- Architected a full-stack web application serving 2 government departments (KSEB and PWD) using React, TypeScript, Express.js, Node.js, PostgreSQL, and Prisma ORM. - Implemented secure authentication with JWT, Google OAuth, and role-based access control (RBAC) across 2 portals, structuring complaint triage for citizen and government workflows. - Consolidated 6 features into 1 centralized reporting system - geotagged uploads, heatmaps, analytics dashboards, PDF exports, notifications, and dual-portal access - replacing manual tracking for 2 departments.	
Smart Inventory Dashboard - Real-Time Inventory Management <i>Live Demo: smart-inventory-dashboard-eight.vercel.app</i>	Dec 2025 – Jan 2026
- Designed a real-time inventory management system using React, Node.js, Express.js, and REST APIs with live stock monitoring, inventory updates, and configurable low-stock threshold alerts. - Developed and tested 2 REST API endpoints for product retrieval and stock management, enforcing threshold business logic with strict input validation on all stock updates. - Deployed full-stack application on Vercel and Render with per-product low-stock alerts, enabling real-time notifications and reducing manual stock-check effort across the inventory catalog.	

ACHIEVEMENTS

NPTEL/SWAYAM - Python for Data Science (Elite + Silver, Score: 75%) Issued by IIT/NPTEL.	Mar 2025
2nd Prize - Python Programming Competition, SJ CET	Oct 2025
